INTRODUCTION

Clifton Productions is a family owned & operated company with over fifty years' experience in the entertainment, exhibition and production industry. The Clifton's team has worked behind the scenes from inception to completion on thousands of projects Australia wide, spanning music concerts and festivals, theatre, sports, broadcast events, and exhibitions. Starting with electrical, rigging and lighting installations for exhibitions and productions, our business has evolved and expanded into major event staging and grandstand seating structures that cement our unparalleled reputation, as the leading and most innovative event partner.

Our talented team of experienced & passionate event professionals are the driving force behind the success of our business, and our key partnerships with some of Australia's leading event organisers, promoters and producers. Our professionalism, extensive knowledge and attention to detail is seen in everything we do, whether it's a small exhibition hire or a month-long production. While our head office is located in Melbourne, the scope of our work reaches Australia wide, and we have fully staffed offices and warehousing in Victoria, New South Wales, Queensland and Western Australia.

// RIGGING

We are Australia's most trusted and respected rigging company. Our extensive inventory provides limitless opportunities from the installation of a simple banner, to delivering the most challenging of projects. Having worked within all of the major exhibition, convention and events venues Australia wide, our knowledge and capability combined with our expertise, provides you with the highest levels of customer service and efficient delivery from concept to completion.

// EXHIBITION LIGHTING

With over 3500 lights, you need to look no further than Clifton Productions, as your lighting partner. Our scale and diverse product range provides us with the opportunity to research and invest in the latest intelligent, and energy efficient lighting products. Working within the exhibition, corporate, major event and entertainment industries, ensures that we are always utilising the latest products, with cutting edge technology.

// GRANDSTANDS

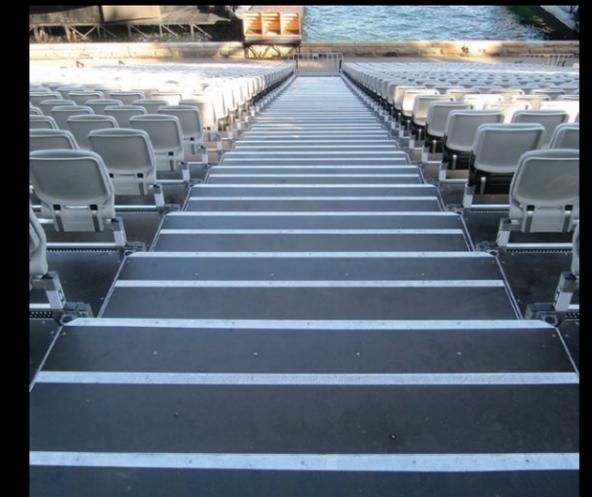

Our grandstands are the highest quality, and safest temporary facilities in the southern hemisphere. Combining our own engineering excellence along with the integrated & interchangeable box seating system coupled with the Layher scaffolding structure, we have designed and delivered some of the most outstanding temporary event facilities Australia wide. From the Pan Pacific World Championships held at the Gold Coast in 2014, to our annual appearance at the Handa Opera on Sydney Harbour for the last 3 years, we are continually lifting the standards in temporary grandstand structures and seating by combining state of the art materials, with our extensive knowledge and expertise in delivering world class event infrastructure.

// GRANDSTAND SEATING

Our seating combines modern materials, cutting edge all polymer soft action tip-up stadium seating in a variety of different colours in both the 901, 903 and 908 ranges. Providing the ultimate flexibility to interchange seat configurations, integrated tamperproof numbering system and delivering maximum comfort, never before seen in a temporary seating facility in Australia.

Providing grandstand seating solutions Nationally for the V8 Supercars Australia, The Voice with Freemantle Media in Sydney along with the National Beach Volleyball series in Glenelg, SA along with many other events both indoor & out. Our seats will provide your event attendees with the best possible experience, whether they are a corporate VIP or general admission ticket holder.

Having played host to International & Local performers and events such as Bruce Springsteen, The Foo Fighters and One Direction, the Hercules Stage delivers has the ultimate experience.

// HERCULES STAGING

The hercules staging system provides the perfect temporary blank canvas to assist you in the production and delivery of the ultimate backdrop to a star studded line up of both International and local performers. Available in 20, 25 and 30m openings 12, 15 and 20m trim heights, 18 and 23m depths, and side or rear cowsheds. The hercules stage has been designed to withstand a wind speed of up 154km/h, accommodating up to 100 tonne roof capacity, at the same time as being engineered to AS standards. Providing the safest temporary stage structure available in Australia, the innovative hydraulic design eliminates the requirement for cranes and pickers, and reduces the overall impact on ground protection.

Having played host to international & local performers and events such as Mariah Carey, Billy Idol, Stereosonic and John Farnham the apollo stage delivers on every level.

// APOLLO STAGING

The apollo staging system provides a smaller physical footprint for a more intimate production with the same benefits as the hercules stage, at the same time providing the perfect environment to produce an outstanding event, that will leave your audience screaming for more. Available in 20 and 13m openings 9 and 12m trim heights, 18m depth, and with cowsheds. The apollo stage has been designed to withstand a wind speed of up to 154km/h, accommodating up to 30 tonne roof capacity at the same time as being engineered to AS standards, providing the safest temporary stage structure available in Australia. The innovative hydraulic design eliminates the requirement for cranes and pickers, and reduces the overall impact on ground protection.

// ARC STAGING

Functional & attractive in appearance with a curved roof structure, the arc stage provides the perfect backdrop for your next event. The curved roof provides a lower loading capacity than the apollo and hercules systems, while still offering plenty of useable space. The arc stage offers an affordable staging solution for council & community events, dj stages and small band performances. The flexibility of this system allows you the opportunity to dream up whatever side structures you desire, whether it be typical pa wings or cantilevered led screen structures. We can make your vision a reality.

// EVENT DECK

Whether it's a concert, major sporting event or an agm in a purpose built exhibition venue, our modular layher event decks are the safest and most structurally sound German engineered staging system available in Australia. Manufactured for both indoor & outdoor events, specially designed with a non-slip surface and available in both timber and carpet finishes, there is no limit to the deck heights, size or location. Available with guard and handrails, the flexibility of the event deck system provides a seamless construction method, with the highest levels of safety, promising a successful performance every time.

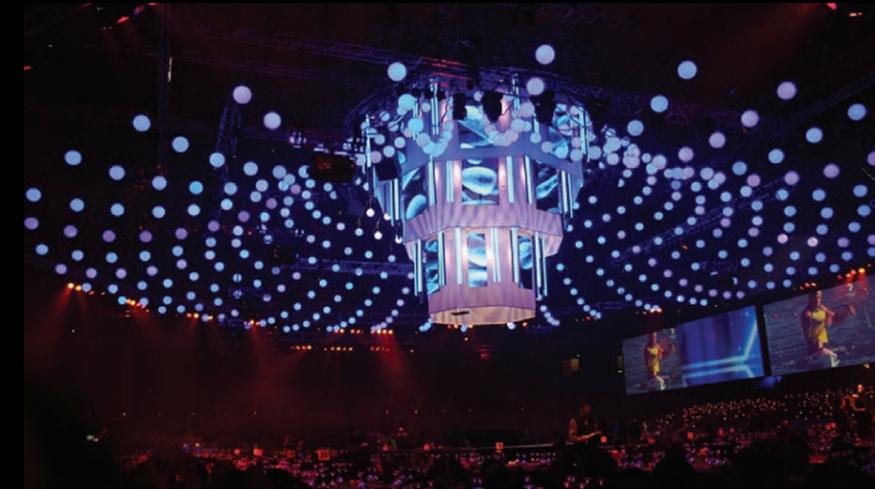

// LED SCREENS

Our extensive inventory of state of the art vuepix led screens and vision control equipment provide event designers and organisers with limitless creative opportunities. Sophisticated equipment requires Clifton's best creative minds to exploit the extreme visual possibilities, now achievable with the latest led screen technology. In collaboration with our clients we set out to create unique, visually enticing and interactive environments that deliver a spectacular experience. Whether you are exhibiting in a trade show, holding a corporate sporting event, designing a set for a rock concert or hosting a prestigious awards & dinner ceremony, we have the right product to compliment your event. With a huge range of indoor & outdoor led screens, the options are endless.

// PRODUCTION LIGHTING

We are Australia's leading event production and lighting hire specialists, providing an enormous range of state of the art lighting and production equipment combined with our extensive knowledge and experience in both the creative and operational elements in event production. The more extraordinary the challenge, the more motivated we are to create the perfect sensory environment, to engage and inspire your audience. Our technical and creative production team have the most extensive experience in Australia. Our reliability and personalised service has afforded us the opportunity to work on many of the largest festivals, tours, corporate events and exhibitions nationally.

// SPECIALISED STRUCTURES

Our ability to think outside the square, and our extensive knowledge of scaffolding, staging and structural engineering creates the perfect combination of resources to assist you in the manufacture, delivery and installation of customised facilities for your event, from initial concept to completion. Our team have the necessary and relevant experience to interpret your vision at the same time, providing a structurally sound and safely engineered product. From a camera tower, to a stage dive platform, or even a set for television production, our talented team can provide a variety of attractive & functional solutions.

// FABRICATION & MANUFACTURING

With over 50 years' experience in delivering events and exhibitions, we have been at the forefront in providing customised solutions, when it comes fabrication. Our technical skills, combined with our extensive knowledge and understanding of manufacturing techniques and engineering excellence, provides you with peace of mind and satisfaction, when looking to create a unique element for your event. We specialise in the manufacture of all varieties of rigging truss, steel fabrication and even production roadcases, with our own range from Aerolyte cases - www.aerolyte.com.au.
