THEBOXSEAT®

903model

ENVIRONMENTAL SUSTAINABILITY

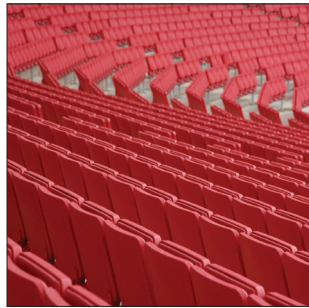

The BOX Seat's unique geometry and compact rotation system supports reduced raw material usage. The design structure promotes deconstruction and component replaceability. All materials are recyclable promoting conservation and environmental awareness. The BOX Seat is subject to multiple International Patent & Design Registrations.

The BOX Seat 903 model is the efficient choice, incorporating a tough polymer seat with exceptional durability. The Box Seat 903 model is the result of meticulous attention to detail and innovative design.

The Box Seat 903 model utilises the same unique rail system as all of The BOX Seat models, making it easy to upgrade your stadium in the future, or use the other models from the range for Members and VIP seating.

The BOX Seat range can all be colour coded. Additional stainless steel rail fixing straps are also available.

The BOX Seat 903 model is slim and compact, making it the perfect solution for high volume seating areas.

The compact folding dimension also increases the ease of spectator access and egress.

The Box Seat range enables a venue to be fitted with the one seating system, saving installation costs, reducing maintenance and allowing seat interchangeability at any time.

The BOX Seat 903 model comes with:

- UV resistance colour certificate.
- Components moulded using recognised quality polymers.
- All materials are UV & FR rated as required.
- Compact seat width for high volume installation.
- Strength and Durability tested.
- TBS rail available in Galvanised or Powdercoated.
- TBS rail system for upgradeability.
- Riser mount & Tread mount options.
- Lens protected numbering system.
- Soft action tip-up mechanism.
- Armrest & Cupholder Accessories.

Standard plastic colour selection:
